

Let's make it real.

Brand partnerships & rates

I'm Miquel, an engineer and the creator behind SoyMaker3D. I turn ideas into real projects and share the process: design, testing, 3D printing and the final result.

01 / PAID CONTENT

€250

per vertical video

Original content creation and publication for Instagram Reels, TikTok or YouTube Shorts. Platforms and distribution are agreed in each proposal.

The same €250 per video applies to filament, accessories and AI tools. The brand provides the materials or access needed for the project.

02 / EQUIPMENT EXCHANGE

3D printers and equipment supplied to keep as compensation for the content.

EQUIPMENT UNDER €500

3 videos

vertical format

EQUIPMENT FROM €500

5-6 videos

vertical format

Selected based on audience fit and availability. For equipment valued at €500 or more, the final number of videos depends on the printer or equipment and the project. Scope and product value are agreed before shipping.

I'm interested in partnerships that bring value to makers: useful products, real testing and the freedom to share an honest experience.

Great projects start with clear expectations.

01 Content built around your product

Creative concept, product testing, filming, editing and publication of the agreed video. My usual approach is practical, with content in Spanish. Other languages, formats and additional assets can be discussed in the proposal.

02 Usage rights and extras are quoted separately

The base rate covers content creation and organic publication on my channels. Ads, whitelisting/Spark Ads, brand reuse, re-editing, original files and exclusivity are quoted separately. Stories, bio links and long-form YouTube content are also agreed separately.

03 Clear scope before we start

We agree deliverables, platforms, duration, revisions, schedule, how long posts remain live and payment terms. Dates depend on availability, product delivery and testing time. The brand covers shipping and agreed delivery costs.

BEYOND THE VIDEO

A community that keeps growing.

100 members

MakerUp · current free community

1,000 users

Discord · previous community

Every partnership has the potential to feature in MakerUp through projects, resources or discussions that are useful to its members. Additional exposure depends on relevance and is not a guaranteed deliverable.

Let's build something together.

Send your product, goal, deliverables, dates, required usage rights and budget. I'll prepare a proposal tailored to your project.
